

Micah Rassi

Full-Stack Developer | Robotics Engineering Background

(574) 529-2179 | micahrassi@gmail.com | marsgate.github.io | linkedin.com/in/micah-rassi | github.com/marsgate

SUMMARY

Full-stack developer with a B.S. in Robotics Engineering Technology from Purdue and five years building internal software with PHP, Java, MySQL, and React. Takes projects from requirements through release and works directly with the people who use the software. Hands-on background with industrial and autonomous mobile robots, and interested in building software for robotics teams.

EXPERIENCE

Full Stack Developer · Polywood · Syracuse, IN May 2021 – Present

- Build and maintain the internal applications production, warehouse, and shipping teams use for orders, inventory, and production scheduling, with PHP, Java, MySQL, and React.
- Work directly with users to find workflow bottlenecks and turn them into requirements and new features.
- Manage projects in Jira and GitHub from requirements through release, setting scope and priorities.
- Led a regression testing initiative that added end-to-end Selenium tests to the front end, tracked in TestRail.
- Diagnose and fix UI and business-logic bugs in production systems, in both new and legacy code.

IT Intern · Polywood · Syracuse, IN Jun 2020 – May 2021

- Resolved service desk tickets and troubleshoot end-user hardware and software issues.
- Received, deployed, and retired company equipment.

Junior Software Engineer · Raven Industries · Wakarusa, IN Jan 2019 – Aug 2019

- Built an internal monitoring service and Grafana dashboard to track application load for the Raven Slingshot team.
- Wrote fixes and enhancements in C#, PHP, and SQL that shipped in product releases and patches.

PROJECTS

Loosey Goosey Robotics · Founder · looseygooseyrobotics.github.io 2023 – Present

- Founded and grew a casual robotics competition from the ground up, and built and maintain its website.

Zippy Manager · Electron, Node.js, JavaScript · github.com/Marsgate/zippy-manager

- Wrote desktop tournament software that generates match schedules, integrates with mobile devices for live scoring, generates elimination brackets, and drives the audience display.

Purdue ACM SIGbots · President · Purdue University 2022

- Led Purdue's VEX U robotics team, which designs, builds, and programs robots for top-level collegiate competition.
- Programmed autonomous routines using tracking wheels, an IMU, and in-house PID and pure pursuit libraries.
- Beta tested PROS, the open-source VEX development environment maintained by SIGbots.
- SIGbots teams won VEX U World Champion titles in 2020, 2021, 2022, 2024, and 2026.

EDUCATION

Purdue University · B.S. Robotics Engineering Technology May 2023

Relevant coursework: Introduction to Robotics (MFET 24800), Advanced Industrial Robotics (MFET 34800)

- Programmed and operated FANUC and Yamaha industrial robots, including 6-axis and SCARA arms.
- Set up guarding for robot work cells in a lab setting, and studied how safety interlocks protect operators.

SKILLS

Languages: JavaScript, PHP, Java, SQL, C/C++

Tools: React, Electron, Git

Robotics: Industrial robotics, autonomous mobile robotics, machine learning
