

Micah Rassi

Full Stack Developer

(574) 529-2179 | micahrassi@gmail.com | marsgate.github.io | linkedin.com/in/micah-rassi | github.com/marsgate

SUMMARY

Full stack developer with five years of professional experience building internal business software with PHP, Java, MySQL, and React. Manages development projects from requirements through release and works directly with end users to improve their workflows. Purdue Robotics Engineering Technology graduate, former president of Purdue SIGbots, and founder of Loosey Goosey Robotics.

EXPERIENCE

Full Stack Developer · Polywood · Syracuse, IN May 2021 – Present

- Build and maintain internal business applications across the full stack with PHP, Java, MySQL, and React.
- Manage development projects from scoping and requirements through release, setting priorities and keeping stakeholders updated.
- Work directly with users to find workflow bottlenecks and turn them into new features and improvements.
- Diagnose and fix bugs in UI and business logic across new and legacy code.

IT Intern · Polywood · Syracuse, IN Jun 2020 – May 2021

- Resolved service desk tickets and troubleshoot end-user hardware and software issues.
- Received, deployed, and retired company equipment.

Junior Software Engineer · Raven Industries · Wakarusa, IN Jan 2019 – Aug 2019

- Built an internal monitoring service and dashboard for the Raven Slingshot team.
- Wrote fixes and enhancements in C#, PHP, and SQL that shipped in product releases and patches.

PROJECTS

Loosey Goosey Robotics · Founder · looseygooseyrobotics.github.io 2023 – Present

- Founded and grew a casual robotics competition from the ground up.
- Built and maintain the competition website and resources.

Zippy Manager · Electron, Node.js, JavaScript · github.com/Marsgate/zippy-manager

- Wrote desktop tournament software that generates match schedules, integrates with mobile devices for live scoring, generates elimination brackets, and drives the audience display.

Purdue ACM SIGbots · President · Purdue University

- Led Purdue's VEX U robotics team, which designs, builds, and programs robots for top-level collegiate competition.
- SIGbots teams won VEX U World Champion titles in 2020, 2021, 2022, 2024, and 2026.

EDUCATION

Purdue University · B.S. Robotics Engineering Technology May 2023

SKILLS

Languages: JavaScript, PHP, Java, SQL, C/C++

Tools: React, Electron, Git

Robotics: Industrial robotics, autonomous mobile robotics, machine learning
